

## Electronic Medical Records

Harris Caretracker is built using cloud-computing technology, so you get instant updates, reliable connectivity, and access to complete global content — all for a lower total cost of ownership. From any Internet-connected computer, physicians can access a secure web interface that is connected to a network of labs, pharmacies, specialists and hospitals.

-  **Time:** Immediate start-up via quick and easy implementation with online training
-  **Simplicity:** Cloud-only solution that connects via web browsers on any computer, available anywhere, anytime
-  **Value:** Multiple feature-rich upgrades and always current content included with low subscription pricing and minimal commitment

## Key Benefits

-  Monitor and measure Meaningful Use participation
-  Process prescriptions and refills at any time, including controlled substances
-  Access the patient information that is relevant and pertinent via charting flexibility and 'quick access' tools
-  Track, escalate and monitor results and orders through interface connectivity with labs, radiology and pathology systems
-  Document the way your physicians prefer: macro text, voice recognition, point and click, and templates
-  Improve communication and diagnosis understanding with your patients
-  Streamline the office by coupling with the Caretracker PM module.

## New Benefits

We are continually investing in Caretracker to help you be as efficient as possible in providing best-in-class care to your patients:

-  **Make it Your EMR** Efficiency is key. Caretracker offers 'One click' access with flexibility and customization in areas such as:
  - Full screen view of the last progress note
  - 'Open activities' view for all patient visit items that need to be completed that day
  - Lab and radiology orders and results for specific overdue, high priority tracking and escalation
-  **Send Every Prescription Electronically** We remain committed to providing a safe, compliant, and efficient electronic prescription solution. Caretracker now has a capability to send controlled substances to pharmacies electronically.
-  **Communicate with your Patients and Other Providers** Standardizing how providers share patient data with one another is essential to improve care coordination. Caretracker
- Direct Messaging helps providers exchange key clinical information discretely and provide a summary of care record for each transition of care and referral.
-  **Successfully Participate in Meaningful Use** ONC-ATCB certified to the 2014 standards as a complete EHR, Caretracker will help you monitor progress in the meaningful use program via an intuitive, continuously updated dashboard with visual graphs, real time reporting capabilities, and education materials with 'how to' tutorials.
-  **Find Diagnosis Codes Fast** Search by ICD-9 or ICD-10 code, medical shorthand, and even words that have spelling mistakes because Caretracker is fully integrated with the Intelligent Medical Objects (IMO) Problem (IT) diagnosis search engine. Combining provider specific favorites list and patient diagnosis history, Caretracker will help make the transition to ICD-10 a breeze.
